ABOUT ME

I'm attending the third and last year of the computer science degree at the University of Porto. As a college student, I have developed an interest in several areas such as software development, artificial intelligence and data science which drives me to continuously expand my knowledge and skills in these fields.

My coursework and projects have provided me with a solid foundation in various programming skills and technologies and positively contributed to my problem-solving and analytical skills, where some of the work I've done is available on my GitHub profile, including:

- Projects**
- MultiAgentSystem - Traffic Control Simulation (Python)
 - View Rides - WebApp (Python Django and Leaflet)
 - StreamingApp - Android Backend and Frontend App (Java)
 - Wine Database WebApp (SQL and Python Flask)

From a social point of view, I have been seeking to integrate myself into university students groups, to expand my knowledge, whether related or unrelated to my degree.

EXPERIENCE

DJANGO FULL-STACK DEVELOPMENT INTERN Mar - Jun 2024
Ad Evolutio | Porto, Portugal

- Internship focused on developing web components for various company projects, primarily using Python Django.

MEMBER OF NÚCLEO DE CIÊNCIA DE COMPUTADORES Feb 2022 - Present
Faculdade de Ciências da Universidade do Porto | Porto, Portugal

- Merchandising team coordinator and member of the pedagogical team

CNC PROGRAMMER Aug - Sep 2022
OSMOPLAS, Indústria de Moldes Lda | Vale de Cambra, Portugal

- I developed skills in programming Heidenhain CNC controls.

EDUCATION

Bachelor in Computer Science Sep 2021 - Present
Faculdade de Ciências da Universidade do Porto | Porto, Portugal

- Expected conclusion: July 2024

High School Sep 2018- Jul 2021
Agrupamento das escolas do Búzio | Vale de Cambra, Aveiro, Portugal

SKILLS

I have acquired skills in Java, Python, HTML, CSS, JavaScript, C, and SQL, allowing me to work on software implementation, artificial intelligence and data science projects.

- Languages**
- Portuguese (native), English (fluent)
